Richard Minardi

SUMMARY

I am an experienced tech professional with experience and research interests including UX/UI design, front-end development, GIS, data visualization and program evaluation

RELEVANT EXPERIENCE

RA Malatest and Associates, Victoria – *Survey Developer*

March 2014 – PRESENT

- Built a map-based location capture interface using the Google JavaScript API to integrate with pre-existing survey software
- Maintained and customized a React-based data visualization product used to monitor and display survey responses
- Maintained and contributed to the company's flagship origin-destination project "Triptelligence", recently deployed on behalf of the CRD:
<http://www.timescolonist.com/news/local/more-people-in-capital-travelling-by-bus-bike-and-on-foot-1.23348201>
- Created survey landing pages and inline styled email invitations with modern templating tools and node.js
- Participated in survey planning and UX design

Cowichan Arts Council, Duncan, BC – *Web Developer Consultant*

January 2013 – August 2013

- Worked closely with a small team creating an online community map
- Interface coded using Leaflet and CartoDB JavaScript APIs
- Worked within project time frame and exceeded stakeholder expectations

SFU Department of Urban Studies, Vancouver, BC – *Web Developer and GIS Consultant*

August 2012 – March 2013

- Developed a custom content management system using Adobe CQ5
- Designed and edited images and graphics using Adobe Photoshop and Illustrator
- Created and managed databases and maps for studying historical change as part of a grant funded community research project

INTERESTS

JavaScript mapping APIs, Github, React.js, node.js Foundation Panini, Bootstrap
